

ALU LINE

Up to 200 kg/h

Furnaces for aluminium brazing with paste or foil

Continuous conveyor belt furnaces with metal muffle working in nitrogen controlled atmosphere for brazing of aluminium parts.

The system is created with a flat or inclined configuration and with a supervision and control system in compliance with Industry 4.0.

Made according to regulations 2006/42/CE, EN746 and EN60204.

Available in UL versions, "Apave" certificates and CQ19 certified (automotive standards).

PERFORMANCE OF OUR EQUIPMENT

- Brazing up to 100% nitrogen atmosphere.
- Entry dimensions from 200 x 100 mm up to 800 x 350 mm.
- Dew point and PPM oxygen controller to obtain the best condition of atmosphere control.
- Complete control and registration of all parameters of the process.

OPTIONAL

- Cooling system, UPS and more on customer request.
